Q12. What was good about the TA?

1. He covered the lecture notes, assignments, and labs all in an hour. Very impressive. He was good because he actually explained what was taught in lectures, step by step. Instead of just doing examples on computer. Very practical.
2. He explains problems in an organising way.
3. do give some tricky questions in comp104
4. well prepared for the tutorial classes

Q13. How might the TA improve?

1. Please write larger when using the whiteboards. And please use darker pens. I feel like this is a problem in facilities in general, because in most classes, the whiteboard pens are not dark enough for people sitting behind row 1 to see, like they are out of ink all the time.
2. more tricky questions should be given
3. the explantion of the laboratory can be released earlier

Note: Please note that the aggregate statistics for department, school and university will be subjected to an updating and finalized on 27 January 2011
