Q12. What was good about the TA?

1. He is always willing to teach even I'm very stupid. And he is very devoted into his work that he is always approachable even on sundays. He is also able to reply to queries efficiently.

Q13. How might the TA improve?

1. don't just talk about tutorial questions, TA can prepare something related to the topic and make some notes for studnets. Also, the tutorial begins at the time the lab is already finished, it is not useful for those who finished the lab alreday. The tutorial sessions should arrange wisely to avoid such thing happens. On the other hand, special help is need for those who can't follow the learning progress. TA can make some extra tutorials to those students.
